Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The disclosure is objected to because of the following informalities:

On page 8, line 9, change "frond" to -front--,

On page 14, line 16, change "yielded" to -yielding--,

On page 24, line 7, change "show" to -shown--,

On page 25, line 3, "heat heated" is not understood by examiner.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting

directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4, 12 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by **Tjoelker et al (6,918,224)**. **Tjoelker et al** discloses a method of forming an elongated impact beam for a vehicle and includes the features of the applicants claimed invention including a clamping device (40a-40d) for an elongated article (10) to be heat treated by heating means (20) in which the area underneath constitutes a heated region (SEE Figure 2), non-heat treated region are provided side by side in a width direction (Figure 2) and at the longitudinal end portions where the clamping means are arranged, column 4, lines 27-52, discuss the clamping fixtures are capable of restraining and releasing the article (10) (ie: can be firmly clamped or loosely clamped) as well as being movable (adjustable). Alternatively, the fixture (40) can clamp the center portions of the article rather than the ends. Since the fixture obviously can't clamp the article in the area where the heating means (20) is located, this is understood to mean that the article can be clamped at the flange portions (SEE Figure 2). As shown in Figure 4, the clamping means are positioned spaced apart from one another and operate on a work table (shown as element 40, in Figure 4) and can be raised and lowered toward an opposing clamping structure.

Allowable Subject Matter

Claims 5-11 and 14-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 21 is allowed.
